## FE4E00001 Electronic Unit Injector E3 Series Technical File

### 1. FE4E00001 Electronic Unit Injector Introduction

#### 1.1. FE4E00001 Electronic Unit Injector Basic Information

Title	FE4E00001 Electronic Unit Injector E3 Series	Quality
SKU1	Z1Y30FE4E00001	Re-manufactured
SKU2	Z1K300FE4E00001	Re-manufactured

#### 1.2. FE4E00001 Electronic Unit Injector Common Part Number

##### (1) Electronic Unit Injector Exchange Information

Injector Part Number	Common Part Number	Common Part Number
FE4E00001	BEBE4E00101	BEBE4E00001

##### (2) Electronic Unit Injector Application Information

Vehicle Model	Engine Model	Engine Model
HIRINTOL	/	/

##### (3) Electronic Unit Injector Common Writing

FE4E00001, BEBE4E00101, BEBE4E00001

#### 1.3. FE4E00001 Electronic Unit Injector Parameter

Adaptation System: Common Rail System

Electronic Unit Injector Series: E3 Series

Electronic Unit Injector Type: Diesel Electronic Unit Injector

#### 1.4. FE4E00001 Electronic Unit Injector Specifications And Dimensions

Electronic Unit Injector Size: 28cm\* 10cm \*6cm

Electronic Unit Injector Net Weight: 1210g

Electronic Unit Injector Gross Weight: 1310g

Electronic Unit Injector Quality: Re-manufactured

Electronic Unit Injector Package Size: 30cm\* 12cm \*8cm

Electronic Unit Injector Type: Diesel Electronic Unit Injector

Electronic Unit Injector MOQ: 4 Pieces

#### 1.5. FE4E00001 Electronic Unit Injector Quality Control

##### (1) Electronic Unit Injector Testing

All electronic unit injectors are tested for electrical characteristics, accuracy, high temperature, low temperature, withstand voltage, leakage, durability, and various working conditions.

##### (2) Electronic Unit Injector Assembling

For the quality control of the electronic unit injector production and installation process, our company strictly follows the standard product installation data and product installation steps to install.

### (3) Electronic Unit Injector Inspection

The factory inspection of the electronic unit injector is undergone full inspection, random inspection, and batch inspection three inspections. Different brands of test benches are used to test the same electronic unit injector for more than three times for factory inspection, and the electronic unit injector installation testing environment are progressed in dust-free workshop.

#### 1.6. FE4E00001 Electronic Unit Injector Customized Service

**(1) Electronic Unit Injector Customized Service Coverage:** Meet the customized needs of OEM manufacturers for shell lettering, logo engraving, electronic unit injector internal packaging, electronic unit injector external packaging and labels customized, etc.

	
Electronic Unit Injector Injector Housing Lettering	Electronic Unit Injector Packaging Box and Label

#### (2) Electronic Unit Injector Customized Service Requirements:

The quantity of customized electronic unit injectors shall not be less than **10 pieces**.

The quantity of customized electronic unit injector packages shall not be less than **1000 pieces**.

Customized products involve the need of specify logo, the OEM manufacturer needs to provide trademark authorization and the sample of logo image file.

**⚠ Once the customized electronic unit injector is sold, it cannot be returned or exchanged if there are no quality problems.**

#### 1.7. FE4E00001 Electronic Unit Injector Packing List and Package Size

##### (1) Electronic Unit Injector Spare Parts List

No.	1	2	3
Image			
Name	Electronic Unit Injector	Injector Nozzle Protection Cover	VCI Anti-rust Bag
Description	Electronic unit injector part number: <b>FE4E00001</b>	Protect the nozzle hole from contamination and clogging	Prevent electronic unit injectors from rusting

No.	4	5	6
Image			
Name	Lining	Oil Absorbing Paper	Injector packaging box
Description	Prevent the injector from being damaged by external forces	Prevent oil leaks	Place the injector and injector accessories

⚠ Minors are prohibited from using the electronic unit injector assembly, O-rings, electronic unit injector housing covers, oil return covers, VCI anti-rust bags, and bubble bags to avoid personal injury.

⚠ The electronic unit injector housing cover and oil return cover are recyclable accessories and can be recycled.

⚠ VCI anti-rust bags and bubble bags are non-degradable materials. Please dispose of them properly after use.

⚠ The electronic unit injector and the installation parts guide tube should be treated with appropriate sealing oil during installation.

## (2) Electronic Unit Injector Box Size

No.	Name	Electronic Unit Injector Packing Size (cm)
1	Electronic Unit Injector Packaging Box	30*12*8

## 1.8. FE4E00001 Electronic Unit Injector Testing Standard and Certificate

Shumatt can provide the factory quality inspection test report of each electronic unit injector to ensure that each electronic unit injector delivered meets the engine performance indicators.

## 1.9. FE4E00001 Electronic Unit Injector Warranty Instructions

### (1) Product Warranty Conditions and Instructions

It is necessary to provide pictures, videos, or test reports detected by the electronic unit injector inspection equipment when the electronic unit injector is abnormal during use as evidence to feed back to the salesman.

Abnormal conditions are properly explained such as: 1. Smoke, 2. Engine shake, 3. Difficulty starting the engine, 4. Engine noise, 5. oil leakage etc.

### (2) Electronic Unit Injector Warranty Coverage

Within 15 days after customer receives the FE4E00001 electronic unit injector, if there is a performance failure and the product has no appearance damage, customer can choose to replace it or repair it;

If the FE4E00001 electronic unit injector has performance problems during the warranty period (6-12 months), and it is confirmed that it is product's problems after testing, you can contact our salesmen to replace the same model or a reworked product with the same performance for free;

If the electronic unit injector house has obvious scratches, it can only be repaired and it will be returned as it is if the product is confirmed to be fault-free.

**⚠ Tips:** For products not covered by warranty, our company can provide paid maintenance services. For products after paid repaired, the same performance problem will have a free warranty period within 3 months from the date of repairing.

**(3) Electronic Unit Injector Out of Warranty Coverage**

- ① The warranty period has expired.
- ② Electronic unit injector failure caused by high temperature, high pressure, humidity, rain and snow, saline-alkali land, earthquake, and used in abnormal environment.
- ③ Customer disassembles or repairs the electronic unit injector personally resulting in damage to the electronic unit injector.
- ④ Electronic unit injector damage caused by man-made reasons (throwing, strong magnetic field magnetization, set fire).
- ⑤ Electronic unit injector failure or electronic unit injector damage caused by non-electronic unit injector design, technology, manufacturing, quality, and other issues.
- ⑥ Electronic unit injector failure due to system pressure exceeding system approved pressure.
- ⑦ Electronic unit injector failure caused by system voltage exceeding approved voltage.
- ⑧ Electronic unit injector failure caused by impurities (water, lead, aluminum powder, iron powder, sulfide) in the system fuel exceeding the standard requirements.
- ⑨ Electronic unit injector failure caused by not installing according to the tightening torque specified in the vehicle engine maintenance manual (the tightening torque is too large or too small).
- ⑩ Electronic unit injector failure caused by not following the installation angle specified in the vehicle engine maintenance manual.
- 11 Electronic unit injector failure caused by not following the cleaning requirements specified in the vehicle engine maintenance manual.
- 12 Electronic unit injector failure caused by failure to replace consumable parts as specified in the vehicle engine maintenance manual.
- 13 Electronic unit injector failure caused by not complying with the intake system fit clearance and exhaust system fit clearance requirements specified in the vehicle engine maintenance manual.
- 14 Failure to replace the consumable parts and the fitting clearance of the oil inlet system pipeline and the electronic unit injector connection in accordance with the fuel intake system specified in the vehicle engine maintenance manual.

**1.10. FE4E00001 Electronic Unit Injector Manufacturer**

**Electronic Unit Injector Manufacturer:** Shenzhen Shumatt Technology Co., Ltd

**2. FE4E00001 Electronic Unit Injector Technical Support****2.1. FE4E00001 Electronic Unit Injector Use Location**

- (1) E.g.: The injector coding is shown below:**

No.	Name
A	Nameplate, Logo, Code

## 2.2. FE4E00001 Electronic Unit Injector Installation

### (1) FE4E00001 Electronic Unit Injector Installation Precautions:

- ⚠ The replacement of the electronic unit injector must strictly follow the electrical system, the approved pressure of the low-pressure fuel intake system, the approved pressure of the high-pressure fuel circuit system, and fuel system replacement consumables requirements (including the low-pressure fuel circuit system filter and the high-pressure fuel circuit) specified in the vehicle engine maintenance manual.
- ⚠ Replacement of wearing parts of the fuel system, cleaning requirements for the connection between the fuel system and the electronic unit injector, the fitting clearance of the electronic unit injector connection, the installation angle and tightening torque of the electronic unit injector, the fitting clearance of the intake system, and the fitting clearance of the exhaust system to ensure the service life of the engine and the normal operation of the electronic unit injector.
- ⚠ When installing the electronic unit injector on the engine, it is necessary to clean the engine block,

cylinder head and other parts connected to the electronic unit injector, and ensure that there is no dust, carbon deposits, water, rust spots, etc.

⚠ When installing the electronic unit injector on the engine, please carefully check the components related to the installation of the electronic unit injector, such as the electronic unit injector pressure plate, screw, electronic unit injector rod and other accessories are not deformed, and install it in strict accordance with the operation steps of the engine maintenance manual.

⚠ It is forbidden to operate the bare electronic unit injector for a long time in an environment with serious dust pollution and corrosion to iron products.

⚠ It is forbidden to operate the bare electronic unit injector for a long time in a strong magnetic field environment.

### 2.3. **FE4E00001** Electronic Unit Injector Not Working Normally

- (1) There is air in the oil circuit of the engine fuel system.
- (2) Vehicle oil pump's oil supply system is not normal.
- (3) Engine common rail system oil leakage or pressure limiting valve damage.
- (4) There is a short circuit, cutting out and poor contact in the wiring harness connected to the electronic unit injector of the vehicle.
- (5) The long-term placement of the electronic unit injector causes the anti-rust oil to solidify, and the internal components are stuck or the oil holes are blocked.

⚠ Before installing, carefully check whether other components in the common rail system except the electronic unit injector are damaged to prevent the electronic unit injector from not working properly after being replaced.

### 2.4. **FE4E00001** Electronic Unit Injector Causes of Being Damaged

- (1) Didn't operate properly according to engine maintenance manual during disassembly or installation, resulting in damage to the electronic unit injector.
- (2) The fuel oil used for the vehicle does not meet the standard cause damage to the electronic unit injector, such as: the water content in the fuel oil exceeds the standard, iron powder, aluminum powder, sulfide impurities exceed the standard, etc.
- (3) The engine is not regularly maintained according to the engine maintenance manual (please refer to the vehicle maintenance manual for the maintenance mileage). For example, failure to replace the lubricating oil of the engine system for a long time will cause abnormal wear of the engine, excessive exhaust gas volume or a large amount of carbon deposits inside the engine. The filter is not replaced during maintenance or the replaced filter cannot reach the original filter standard. all above reasons can cause damage to the electronic unit injector.
- (4) The abrasion of the electronic unit injector produces iron powder and aluminum powder enter the electronic unit injector and cause damage to the electronic unit injector.
- (5) The deformation and abrasion of fuel tank result in iron powder or aluminum powder entering the electronic unit injector and causing damage to the electronic unit injector.

- (6) The electronic unit injector is damaged due to replacement or adjustment of the relevant parts of the electronic unit injector. For example, the valve clearance does not meet the standard after the engine is repaired, the replacement or modification of the wiring harness connected to the electronic unit injector fails to meet the original standard.
- (7) The engine is overheated and overloaded for a long-time working result in damage to the electronic unit injector.
- (8) The electronic unit injector will be damaged naturally at the end of its working life.
- (9) The electronic unit injector is magnetized (electronic unit injector parts' magnetic exceeded) causing the electronic unit injector to not work properly.

**⚠ Before replacing the electronic unit injector, please check the engine parts carefully according to the engine maintenance manual to avoid the electronic unit injector being damaged again after replacement.**

## 2.5. **FE4E00001** Electronic Unit Injector Technical Support Obtaining Methods

(1) Electronic Unit Injector Technical File, visit <http://shumatt.com> to get the technical file.

(2) Electronic Unit Injector Technical Videos

**YouTube:** [https://www.youtube.com/channel/UCByvYBx7VjV\\_mAfxh\\_Hu-aw](https://www.youtube.com/channel/UCByvYBx7VjV_mAfxh_Hu-aw) to get the technical videos, constantly follow can get more information.

**Shumatt:** Visit <http://shumatt.com> to get the technical videos.

(3) Electronic Unit Injector Information Query Software

TruckBook Parts EPC APP, Android/Apple App Store download and install, visit <http://shumatt.com> to get the download and installation tutorial

(4) Search the fuel electronic unit injector test data through TruckBook Parts EPC APP.

## 3. **FE4E00001** Electronic Unit Injector Purchase and Delivery

### 3.1. **FE4E00001** Electronic Unit Injector Purchase Payment Term

**Payment Terms:** T/T, PayPal, Alipay, WeChat

**⚠ Please contact our salesmen for specific payment information.**

### 3.2. **FE4E00001** Electronic Unit Injector Main Sales Markets

**Electronic Unit Injector Main Sales Markets:** Asia, Europe, North America, South America, Africa etc.

### 3.3. **FE4E00001** Electronic Unit Injector Declaration Requirements

Shumatt can assist customers to provide the following documents for import customs clearance: contract, invoice, packing list, bill of lading, insurance policy, certificate of origin, etc.

### 3.4. **FE4E00001** Electronic Unit Injector Shipping Ways

**Destination in China Areas:** SF Express, Debon Express, the corresponding logistics company can be provided according to customer requirements in special cases.

**Destinations Out of China's Areas:** DHL, UPS, FedEx, TNT air, ocean or other shipping methods required by customers.

### 3.5. FE4E00001 Electronic Unit Injector Lead Time

**Lead Time:** Send out within 3 – 7 working days after receiving payment (Except for special products and special cases).

### 3.6. FE4E00001 Electronic Unit Injector Logistics Time for Destination Out of China's Areas

**DHL Logistics Time:**

Country or Region of Departure	Hong Kong, China	Other Countries or Regions of Asia	Australia and New Zealand	Europe	America	Other Countries
China's Mainland	7 Days	7 Days	8 Days	8 Days	8-12 Days	7-10 Days

**UPS Logistics Time: Country or Region of Departure: China's Mainland**

Country of Destination	Estimated Arrival Time	Country of Destination	Estimated Arrival Time	Country of Destination	Estimated Arrival Time
Japan	3 Days	UK	5-7Days	Egypt	5-7 Days
Turkey	5-7 Days	Singapore	3 Days	Switzerland	5-7 Days
Bahrain	5-7 Days	Latvia	7-10 Days	New Zealand	7-10 Days
Sri Lanka	5-7 Days	Thailand	3 Days	Austria	5-7 Days
Romania	5-7 Days	Vietnam	3-5 Days	Estonia	5-7 Days
Malaysia	3-5 Days	Israel	5-7 Days	Mexico	7-10 Days

Indonesia	3-5 Days	Morocco	7-10 Days	Pakistan	7-10 Days
Kuwait	7-10 Days	/	/	/	/

**⚠ The logistics time is for reference only and is subject to the actual arrival.**

### 3.7. FE4E00001 Electronic Unit Injector Packing

**Domestic Express Packaging:** Usually wrapped in waterproof scotch tape, such as picture No. 1.

**International Express Packaging:** Wrapped with waterproof yellow tape After wrapping the black protective film, such as picture No. 2.

**Pallet Shipping:** Use fumigation free and recycling trays that meet export requirements, and use white

wrapping protective film to wrap and bind with cable ties for the outside, such as picture No. 3, also, the products can be packaged according to customers' requirements.

⚠ The packing tray is made of plastic and can be recycled.

⚠ Transparent tape, yellow tape, black wrapping protective film, white wrapping protective film are non-degradable materials, please dispose of them properly.

⚠ Minors are prohibited from using transparent tape, yellow tape, black wrapping protective film, and white wrapping protective film to avoid personal injury.

Pic No. 1

**Domestic express packaging:**

Wrapped with Transparent tape

Pic No. 2

**International express packaging:**

Wrapped with yellow tape after wrapping black protective film

Pic No. 3

**Pallet shipment:** Use pallets that meet export requirements and wrap with white plastic wrap and tie.

#### 4. **FE4E00001** Electronic Unit Injector Storage Standard

##### (1) Choose a Suitable Storage Place

The warehouse and cargo yard where the electronic unit injector is stored should be kept clean and dry, and away from the factory buildings that generate harmful gases and dust; do not mix with acids, alkali, salt, and other substances; the storage place should have a good drainage system; the cargo yard should be flattened with gravel or furnace ash etc. to enhance the water permeability of the surface layer to keep the

reservoir area dry.

## **(2) Strict Requirements of Warehousing**

Strict inspections should be carried out when the electronic unit injectors are put into storage, the surface cleaning work should be done well to remove water traces, oil stains, ashes, and other dirt, remove the rust and do anti-rust treatment in time. Packaged electronic unit injectors must be protected from damage.

## **(3) Keep The Warehouse Dry And Preventing Moisture**

The relative humidity is usually below 70% for the electronic unit injectors placed in the room, and the corrosion of the electronic unit injectors is significantly reduced.

Electronic unit injectors must be stored in the warehouse, and they are forbidden to store in the same warehouse with commodities with high water content.

## **(4) Stack Properly**

After the electronic unit injector is exposed to rain, the corrosion rate will increase significantly. The purpose of sealing is to isolate the electronic unit injector from rainwater and humid air, so the warehouse window should be checked in time to avoid rainwater entering the warehouse.

If the electronic unit injector package is damaged, it should be repaired or replaced; when the package is damp, the packaging material should be dried; if the original anti-corrosion and oil applied at the factory is found to be damaged or dried up, it should be cleaned and re-applied oil in time.

It is forbidden to leave the electronic unit injector exposed in the air for a long time.

It is forbidden to store acids, alkalis, salts, and other substances together with the electronic unit injector.

The unpacked electronic unit injector must be rust-proof during secondary storage.
